

VIOLATIONS & SILENCING OF VICTIMS OF PSYCHIATRISTS IN AUSTRALIA

At the moment Australia doesn't allow the right to refuse psychiatrists' products. Victims of Psychiatrists (VOP) are held in servitude, their bodies and abilities subjected to extreme harm, internal organs overworked, aged and disfigured rapidly by forced psychiatric drugs and procedures. Furthermore, refusal of psychiatrists' products is deemed a 'reason' to force psychiatric treatments in larger more painful doses to attempt to break VOP into compliance.

Australia is inflicting vile, cruel life destroying forced psychiatry on some people, while allowing other people to maintain the liberty of thought, physical, emotional and creative abilities for the same behaviour. For the Australian government to cause such inequality is utterly anti-human rights. No one should be subjected to forced/ coerced psychiatry - it just shouldn't be allowed.

Australia systematically goes against the will and preferences of VOP who:

- Verbally articulate their refusal of MH services,
- Write of their refusal of MH services, including Advanced Directive
- Engage tribunal measures to further uphold their right to refuse MH services

This over the top denial of autonomy, making for even more difficulties for people of culturally and linguistically diverse backgrounds.

Disabled of the right to personal autonomy and consent, by members of the industry that profit from this, on the basis of

accused disability VOP are forced to ‘consume’ a psychiatrists’ product they do not want. It is a life destroying, corrupt way for a product to have a market, when, without government force, the products would not have buyers.

Horrendous violent cruel maltreatments that are labelled ‘necessary’, ‘appropriate’ and ‘effective’ - allow for what is unnecessary, inappropriate and ineffective for any kind of person, in any kind of situation. The term ‘compulsory assistance’ allows forced human experimentation, to be conducted on a group of people that have historically been subjected to this kind of violation more than any other group of people in Australia. Other bureaucratic terms such as ‘last resort’ act as legal loopholes, enabling misuse of emergency powers to forcibly exploit people for lucrative human research and further frustrate implementation of the UN CRPD.

KEY QUESTIONS PERTAINING TO VIOLATION OF VICTIMS OF PSYCHIATRISTS IN AUSTRALIA

- Why has Australia so far done nothing to stop discriminatory State/ Territory Mental Health legislation that persecutes people on the basis of accused disability?
- If preventing suicide is important to the Australian government, why does Australian legislation allow forced drugging that causes such pain, humiliation, retarding of abilities that a person subjected to this 24/7 indefinitely would rather die than live their time as a laboratory specimen?
- If stopping violence is an important part of the Mental Health system, why are victims of crime and abuse being subjected to forced psychiatry, that makes them even more vulnerable to further abuses, while perpetrators of violent crimes/ abuses are rarely subjected to forced psychiatry?

- Why is Australia actively denying and shutting down conversation about harms caused by radio frequencies (RF) and experimental/ subversive equipment, subjecting those people harmed by RF with the further harm of forced psychiatry?
- Why are people who are suffering from chemical sensitivity being subjected to forced psychiatry? When will the Australian government begin moving towards access to work and community spaces (such as transport, courts of law, housing, work and social spaces...) that are ‘fume free’ for the increasing numbers of people being disabled by toxins in fragranced products?

SYSTEMATIC VIOLATION OF CRPD UNDER MENTAL HEALTH LEGISLATION IN AUSTRALIA MUST BE STOPPED

ARTICLES 12, 15, 21, 29

- The right to refuse psychiatrists’ products, procedures and programs must be upheld and legislated forced/ coerced mental health must be abolished. Advanced Directives must be recognised.
- Will and preferences of a person must be upheld - threats and violations, detention must no longer be allowed to occur; nor removal privileges, necessities, employment, voting rights - in order to force a person to consent to Mental Health products/ procedures/ programs.

ARTICLE 9

- The accumulation of toxic substances (via Personal Products, air fresheners and cleaning products) in public/ work spaces must be recognised as a barrier to those disabled by these toxins, and legislation put in place to reduce human exposure to these toxic substances.

ARTICLE 13

- Australia must provide access to justice and legal support for people violated by State/ Territory Mental Health legislation, and other violations that were denied validity when VOP were subjected to forced psychiatry and exploited for human research.

ARTICLE 15 & 21

- Conversations about harm caused to people via psychiatrists' violations, radio frequencies and other subversive equipment, chemical pollution, and other abuses (that have been denied validity and subjected to forced psychiatry) must be promoted, rather than continue to be silenced and denied through forced psychiatry.

ARTICLES 1-6, 14, 15, 16

- Human research conducted from information gathered via forced/ coerced mental health, or through other violating means - must not be allowed to continue. Victims of forced human experimentation must be recognised, as having been violated through government legislation, as part of reparations.
